Efficiency. Preparedness. Flexibility. Accuracy. TECHNICAL SKILLS:

| Javascript | MySQL | MariaDb | Node.js | Express | React | Nginx | HTML | CSS | Git | Github | Bulma |
Windows | Linux | MacOS | Wordpress | SCSS | SASS | CSS | UI | AdobeXD | Bootstrap | Materialize | Fetch |

TECHNICAL EXPERIENCE

Calebra's CPR Training LLC June 2021

Reactjs, Bootstrap , Square API

Goal: Create an attractive and functional website for a CPR training business.

- Used Bootstrap CSS framework to assist with styling many of the components.
- Integrated the "Square" appointment API into site to allow users to make appointments with the business.
- Used a map API to allow users to easily locate the business.
- Implemented React Router DOM in order to dynamically navigate pages.

COVID Hospital Website April 202

Reactjs, MySQL, Node.js, Express

Goal: To create a web page that looks similar to the popular media website "Pinterest".

- Used MySQL database to store data for the website.
- Used react hooks to control dynamic data on webpage.
- Used fetch api in order to fetch data from database using React, Node and MySQL.
- Implemented React Router DOM in order to dynamically navigate pages.

Love -Paws Pet Adoption Site, December 2020

React, Express, HTML, CSS, React

Goal: To create a site that displays animals available for adoption.

- Utilized javascript in order to filter the different types of animals depending on the viewers' needs.
- Used React hooks to implement counters.
- Used the grid system for the layout of items and responsiveness.
- Implemented a dynamic carousel.
- Used React library in order to make UI dynamic and user friendly.
